DUCT TEMP. & HUMIDITY TRANSMITTER

(GDTH-1420)

Application

"GDTHO" Duct Temperature & Humidity Transmitter is intended for ventilation and

Air-handing units to detect Duct temperature and relative humidity.

Especially, this unit is very suitable for using in pulp/textile/food warehouse, greenhouse, computer room, R&D room, indoor swimming pool, hospital, etc.

Equipment Combinations

This unit can be used with all system equipments that can receive output signals 4~20mA DC of the detector.

Operating Mode

•	Relative humidity
	Electronic sensing circuit varies signal into 4~20mA DC
	(Within 0~100% relative humidity)

• Temperature

This Transmitter senses temperature by sensing element of PT 1000Ω which varies electrical resistance depending on sensing temperature

Technical Data

: 24V AC/DC ±20%
: 50 or 60Hz
: below 1VA
: -30~+130℃ / 0~100%RH
: Integrated Circuit
: at 20~90%RH, ±3%RH
: Pt1000Ω(Pt100Ω)/4~20mA DC

- SENSING TIME : Approx, 20sec.
- AMBIENT TEMPERATURE : On Operation: -35~+80°C
- AMBIENT HUMIDITY : On Operation : below 95%RH
- PROTECTION CLASS : IP54
- CABLE FITTING : PF 1/2"
- WEIGHT : 0.17Kg(W/BRACKET)

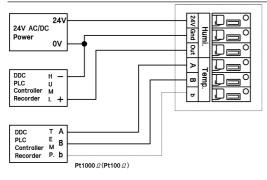

Mounting Notes

• Mounting positions :

- At the detector has to be mounted on supply duct, the detector must be kept between 3 to 8 meters from the humidifier unit.

- For accurate measurement of the temperature, follow recommendation as :
 - Steam humidifier : between 5 to 8 meters
 - Spray water fogger: between 3 to 10 meters air duct supply.
